- The applicants' land should be filled with earth filling with proper compaction to the minimum Level of (+) 22.400m (i.e.) 2.65m above Sluice No.1 sill level as (+)19.750m MSL of Chembarambakkam tank on Northern side of the applicant site to protect the site from inundation during floods. The process of earth filling and compaction should be done in layers of not more than 0.30 metre depth to achieve required degree of compaction for the depth varying from 1.35m to 2.05m depending upon the existing field levels. Also, the applicants should provide emergency pumping operation for the seepage water, if it is proposed to have basement floor and as well as dewatering arrangements during flood periods.
- The all round pavement level within the site should be less than 22.400m. The applicants should prepare the layout proposal by considering the suitable internal storm water drainage network as micro drains of suitable sizes as per site conditions within the site and the same should be connected to the local drain/ channel so that the ultimate disposal of storm water should be discharged to the nearest natural storm water channel/drains at their own cost.
- The applicant should provide rainwater harvesting, roads with road side drains and sewerage treatment plant and its disposal and garbages / debris and other solid waste management at his own cost as per norms in existence within the applicants' land according to existing rules in force and should get proper approval from competent authority without fail.  
 The sewage or any unhygienic drainage (Treated or Untreated) should not be let into drain/channel/course at any cost and the debris and other materials should not be dumped into the drain / surplus course obstructing free flow of water. The applicants should make drainage network, at their own cost and the same is to be connected to natural storm water drainage / channel. There should not be any hindrance to the free flow of internal drain to downstream.
- Since the site exists in close proximity with the channel on North, the necessary setback distance should be provided within the site as per site conditions as per the norms in existence and as per the rules in force of CMDA (as per the circular issued by the office of the Commissioner of Town & Country Planning, Chennai-2 vide Roc. No.4367 / 2019 - BA2 Dated: 13.03 2019) during development especially on North and there should not be any construction activities in setback areas in future also. The CMDA should issue completion certificate only after obtaining compliance certificate NOC from WRD.
- The applicants should clearly demarcate the boundary of their land before commencement of any developmental activities especially on the North side in the presence of Revenue and WRD authorities. The applicants should also maintain the measurement of the width of the channel earmarked in the Revenue records and should never be altered and must be maintained at all time without any encroachments and should be maintained as per Revenue records (FMB). If any damages occurred to the channel, the same should be restored to its original condition at their own cost.
- The permission granted to the applicants, should not be altered / modified/ changed to any others. Based on the records submitted by the applicants, the permission is granted. If any documents seem to be fake / manipulated / fabricated, in future the above permission will be cancelled without any correspondence. Hence, the applicants are solely responsible of genuinely of the documents submitted.
- The WRD officers should be allowed to inspect the site at any time, during execution and thereafter, if necessary. Advance intimation should be given to the WRD officers concerned before commencement of work.
- The applicants should abide by the rules and regulation of the WRD from time to time. The applicants should also abide court of law of both State & Central Government from time to time.
- The applicants should not object at any time for the maintenance works / improvement works of the channel which is proposed to be carried out by WRD. The applicant should give an undertaking in writing to the effect that the above proposal will not obstruct in case any maintenance / improvement / development works as per Revenue records [FMB], which are proposed to be carried out by WRD in future periodically.
- The sewage water from the applicants' land should not let into the drain and for the disposal of the sewage water, suitable arrangements should be made for the same by the applicants, and as well as the construction materials / debris / garbages should not be dumped into the channel/river at any cost.  
 At any cost, sewage / sullage should not be let into river, and the garbages, debris and construction materials should not be dumped into the channel/river restricting the free flow of water.
- The applicants should get clearance certificate for their site from the Revenue department to make sure that the site is not an encroached property from the water body as well as confirming this proposed site boundaries.
- WRD is giving opinion only in connection with the inundation aspect and does not deliver any rights to the applicants to encroach the WRD/ Government Lands/ river. The NOC for their site from the WRD is purely issued on the basis of inundation point of view.
- The applicants should not carry out any other cross masonry structures across the channels without prior permission from local body.
- The Channel in SF.No.331 on Northern side of the applicant land should be completely desilted and resectioned by constructing retaining wall on either side of the channel with concrete bed as per the FMB at the applicant's own cost. The bed level of the above channel should be ascertained and restored before commencing the development activity in the presence of the concerned WRD Executive Engineer. Moreover, the width of entire channel as per Revenue records (FMB) along & within the stretch of applicant's land should be maintained properly without any change and without encroachments.
- The Government channel in SF.No.331 stretch abutting the applicant boundary should be marked as per FMB and monitored and maintained by the applicants at their own cost, upto their stretch the width of the channel should be maintained without encroachments as per Revenue records and the hydraulic parameters of the field channel should be maintained. The applicant should make necessary periodical arrangements for free low of water through the existing channel to the downside area within the proposed layout site. Also, the applicant should de-silt the channel periodically and remove the obstruction then and there without any hindrance for free flow of water at their own cost within the proposed land, after the completion of project also.

The owner of the document received from the applicant in respect to the ownership is purely of applicant's responsibility and it is only for reference purpose to this department. The legal validity of this document should be verified by the Development / Revenue authorities. The specific remarks on inundation are purely issued on technical grounds in respect to the physical location of land.

Failing to comply with any of the above conditions, WRD reserves rights to withdraw the Technical opinion on inundation point of view to the above proposed site and in event, the applicants shall not be eligible for any compensation whatsoever and as well as legal entity.
