The Government Channel in S.F.No. 191 on Northern side and S.F.No. 240 on Eastern side should be marked as per FMB and monitored and maintained by the applicant at his own cost. The width of the channel should be maintained without encroachment as per Revenue records and the hydraulic parameters of the field channel should be maintained. The applicant should make necessary periodical arrangements for free flow of water through the existing channel to the downside area within the proposed layout site. Also, the applicant should de-silt the channel periodically and remove the obstruction then and there without any hindrance for free flow of water at his own cost boundary along the proposed land.			
21.0 262 27.0 28.00.262/2B LOCAL BODY APPROVED SUB DIVISION VIDE P.P.NO.238/2023 D.DIS.NO.144/2023, DATED:08.05.2023. VACANT PLOTS VACANT PLOTS VACANT PLOTS	10. The applicants should not object at any time for the maintenance work / improvements work of the odai to be carried out by WRD. The applicant should not dump the garbages / debris in the odai and avoid the sewage water into the channel, etc,. The applicant should give an undertaking in writing to the effect that the above proposal will not obstruct in case any maintenance / improvement / development works as per Revenue records [FMB] are to be carried out by WRD in future periodically. Technical Suggestions:			
	a. The applicants should prepare the layout proposal by considering the suitable internal storm water drainage network drain as micro drains of suitable sizes within the site as per the site condition. The same should be connected to the local drain / channel, rainwater harvesting, roads with road side drain and sewerage treatment plant and its disposal and garbages / debris and other solid waste management as per norms in existence within the applicant's land according to existing rules in force and should get proper approval from competent authority without fail. The sewage or any unhygienic drainage (Treated or Untreated) should not be let into drain / channel / course at any cost and the debris and other materials should not be dumped into the drain / surplus course obstructing free flow of water. The applicants should make drainage network, at their own cost and the same is to be connected to natural storm water drainage / channel. There should not be any hindrance to the free flow of internal drain to downstream.
